## Work Experience

---

### iServeU Tech. Pvt. Ltd.

**Bhubaneswar, Odisha**

*Software Engineer 1*

*Nov '22 - Present*

- Developed a system to create a deltalake consisting of 120+ tables ingesting data from 45+ sources using kafka, Pyspark, S3 and Athena to provide reports to 140+ clients replacing BigQuery Reports bringing down costs by 75%.
- Developed an Airflow-based automated Cassandra DB purging system including full table repair and compaction, improving efficiency by 25% and reducing configuration needs by 10%
- Created Data Pipeline using Airflow to generate around 450 reports from bigquery for 30+ products and store it in GCS bucket on daily and hourly basis reducing manual work by 100%.
- Led a team in automating the bank reconciliation process using FastAPI, Pandas, Dask, Numpy and Google Cloud Storage, reducing manual effort by 95% and upto Rs. 10 lakh annually the company paid for third party services.
- Developed automation system which would automatically clear Inprogress transactions in realtime based on NPCI reports for AEPS, IMPS, UPI, MATM using Pub/Sub, FastApi, GCS Bucket, Pandas and Numpy.
- Led a team of 2 Software Engineers and 4 interns

### iServeU

**Bhubaneswar, Odisha**

*Software Engineer Trainee*

*May '22 - Nov '22*

- Designed the data pipeline architecture for a new product that quickly scaled from 0 to 125,000 daily active users.
- Automated ETL processes across billions of rows of data, which reduced manual workload by 29% monthly.
- Collected, cleansed, and provided modeling and analyses of structured and unstructured data used for business initiatives which resulted in 1Cr annual savings.
- Overhauled the security measures for 80+ servers by initiating new methods to protect systems from malicious actors using ML models.
- Built a machine learning model that accurately predicted customer behavior, enabling the company to target their marketing efforts and increase sales by 15%.
- Used Logistic Regression along with Apache Kafka to detect fraud transactions in real time.

### iServeU

**Bhubaneswar, Odisha**

*Software Engineer Intern*

*Feb '22 - Jun '22*

- Proficient in Linux, cloud infrastructure, and scripting for automation, optimizing deployment processes for Java, Node, Python, React and enhancing scalability.
- Worked closely with operations to identify customer needs and demands.
- Worked with client to understand business needs and translate those business needs into actionable reports in Tableau, saving 17 hours of manual work each week.
- Used Spark in Python to distribute data processing on large streaming datasets, improving ingestion and speed by 45%

## Skills

---

**Programming Languages:** Python, C++

**API Development:** Flask, FastAPI

**Databases:** SQL (PostgreSQL), NoSQL (MongoDB, Cassandra), Cloud (Bigquery, Redshift)

**Big Data:** Delta Lake, Pyspark

**Data Science:** Pandas, NumPy, Dask, Dash, Bokeh, Streamlit, Scikit-learn

**Cloud Platforms:** Google Cloud Platform (GCP), Amazon Web Services(AWS)-(Athena, Glue)

**Operating Systems:** Linux, Windows

## Certifications

---

**Coursera:** Deep Learning Specialisation

**Coursera:** Intro to Tensorflow for AI, ML and DL

**Coursera:** Improving Deep Neural Networks

## Education

---

### Burla

*Veer Surendra Sai University Of Technology*

*2018 - 2022*

Bachelor of Technology - BTech, Electrical and Electronics Engineering

### Gurgaon

*Blue Bells Public School*

*2003 - 2018*
